Dolphin...The Key to Quality

In this day of imitations and copies, there is one thing that cannot be substituted. Experience. For over 20 years now, Dolphin has established itself as the trendsetter in the industry. And in 1976, Dolphin revolutionized the motorhome industry by first introducing the timely and highly successful Micro-Mini Motorhomes that were the forerunners of today's self-contained units.

Today's smaller motorhome has established itself as a popular alternative for the RV'er. Gas prices are higher, but we still find that you want the freedom and independence of getting away without the unreasonable sacrifices. And the key

to today's recreational enjoyment is owning a quality motorhome at a cost that doesn't put you in the poorhouse. A Dolphin/Toyota Mini-Motorhome is the answer.

From the first time you step into this engineering wonder, you'll be pleasantly surprised. You'll marvel at the interior richness, spaciousness, and ceiling height that you would normally associate with a large motorhome. A lowered floorline gives you extra headroom, better handling, and a low exterior profile. This cuts down wind resistance for better performance and added gas mileage to the already economically proven power plant.

Time for personal relaxation and entertainment is at a premium these days, therefore every dollar you spend must be worthwhile. The Dolphin motorhome is a way to stretch your investment now and for the future by going with a quality, proven product. The key to Dolphin's success story is that when our name goes on, we're putting our reputation on the line.

Introducing the Motorhome of the 80's

In this day of imitations and copies, there is one thing that cannot be substituted. Experience. For many years now, Dolphin has established itself as the trendsetter in the industry. And in 1976, Dolphin revolutionized the motorhome industry by first introducing the timely and highly successful Micro-Mini Homes that are the forerunners of today's fully self-contained units.

Today's smaller motorhome has established itself as a popular alternative for the RV'er. Gas prices are higher, but we still find you want the

freedom and independence of getting away without the unreasonable sacrifices. This is why we're proud to introduce the Dolphin Nissan line for the 80's.

From the first time you step into this engineering wonder, you'll be pleasantly surprised. You'll marvel at the interior richness, spaciousness, and ceiling height that you would normally associate with a larger motorhome. A lowered floorline gives you extra headroom, better handling, and a low exterior profile. This cuts down wind resistance for better performance and added gas mileage to the already economically proven power plant.

Time for personal relaxation and entertainment is at a premium these days, therefore every dollar you spend must be worthwhile. The Dolphin motorhome is a way to stretch your investment now and for the future by going with a quality, proven product. When our name goes on, we're putting our reputation on the line.
