Toyota Series

Introducing the Motorhome of the 80's

In this day of imitations and copies, there is one thing that cannot be substituted. Experience. For many years now, Dolphin has established itself as the trendsetter in the industry. And in 1976, Dolphin revolutionized the motorhome industry by first introducing the timely and highly successful Micro-Mini Homes that are the forerunners of today's fully self-contained units.

Today's smaller motorhome has established itself as a popular alternative for the RV'er. Gas prices are higher, but we still find you want the

freedom and independence of getting away without the unreasonable sacrifices. This is why we're proud to introduce the Dolphin/Toyota line for the 80's.

From the first time you step into this engineering wonder, you'll be pleasantly surprised. You'll marvel at the interior richness, spaciousness, and ceiling height that you would normally associate with a larger motorhome. A lowered floorline gives you extra headroom, better handling, and a low exterior profile. This cuts down wind resistance for better performance and added gas mileage to the already economically proven power plant.

Time for personal relaxation and entertainment is at a premium these days, therefore every dollar you spend must be worthwhile. The Dolphin motorhome is a way to stretch your investment now and for the future by going with a quality, proven product. When our name goes on, we're putting our reputation on the line.

DOLPHIN

Ford Series

Introducing the Motorhome of the 80's

The Ford Series of Mini-Motorhomes are built on high mileage domestic chassis, and offer some distinct advantages over conventional type motorhomes.

- High Gas Mileage
- Roomier, Cooler, Quieter Cabs
- Easier to Service
- Easier to Maneuver
- More Frontal Safety

Dolphin, a premier manufacturer of fine quality RVs for over 18 years, has recognized the need for a motorhome that will offer the consumer good gas mileage and all the conveniences of the larger motorhomes, but in a smaller more manageable package. With the new Ford Series we have combined all of the desirable features found in the large rigs and at an affordable price.

Time for personal relaxation and entertainment is at a premium these days, therefore every dollar you spend must be worthwhile. The fuel efficient Dolphin Ford Series motorhome is a way to stretch your investment now and for the future.

300 Den

500 Rear Dinette

300 Den

The cozy den-like atmosphere becomes evident as you sit in one of the comfortable barrel chairs or divan (comes with optional twin facing divans) of this economical model.

500 Rear Dinette

Dine in this unique model and experience the spaciousness that the surrounding large radius tinted windows provide.

Outside Storage Features: The outside storage compartment is great for those items you don't want inside the motorhome. The generator compartment can also be used as a large trunk if you choose to not have a generator installed.
